

## **Andrea Goethals**

Andrea Goethals leads the development and operation of Harvard's digital preservation program and the management and oversight of the Digital Repository Service (DRS), Harvard's large-scale digital preservation repository. Her current focus is on the practitioner issues of digital preservation, including building sustainable programs, developing scalable repository processes, increasing staff capabilities and planning large-scale content and metadata migrations.

She directed the National Digital Stewardship Residency (NDSR) Boston program, and participates in the IIPC Preservation Working Group and the NDSA Standards and Practices Working Group.

She holds masters degrees in urban and regional planning and computer science from the University of Florida.
